-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Buhrer et al (US 3,601,161).

As to claims 1 and 7, Buhrer et al discloses a molding sand supply comprising a sand reservoir (2) for delivering sand, a belt conveyor (4), a flask (9), and means for controlling belt speed (not shown).

As to claims 2, 3 and 8, guide plates (6) to distribute sand.

As to claims 4 and 9, a funnel (5) to guide falling sand.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5, 6, and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Buhrer et al (US '161) in view of JP 360191635A.

Art Unit: 1725

Buhrer et al disclose the claimed invention above, but lacks the mentioning of detecting the weight with sensors.

However, JP '635 discloses weight sensors to monitor the weight ratio.

Therefore, it would have been obvious to an ordinary skill in the art at the time applicant's invention was made to have weight sensors taught by JP '635, in Buhrer et al in order to monitor the weight of the sand.
